

**CVS/CAREMARK MAINTENANCE DRUG LIST**

EFFECTIVE AS OF 10/26/2015

Maintenance drugs are prescriptions commonly used to treat conditions that are considered chronic or long-term. These conditions usually require regular, daily use of medicines. Examples of maintenance drugs are those used to treat high blood pressure, heart disease, asthma and diabetes.

Due to the large number of available medicines, this list is not all inclusive. Please note that this list does not guarantee coverage and is subject to change. Your prescription benefit plan may not cover certain products or categories, regardless of their appearance on this list. Where a generic is available, it is listed by the generic name. If no generic is available, then the brand name appears. This list represents brand products in CAPS and generic products in lower case *italics*.

If you have questions about your prescription benefits, please log on to your account at [www.caremark.com](http://www.caremark.com) or call Customer Care at the toll-free number on the back of your prescription ID card.
