

# Sutter Health Plan Formulary

## Drug List for HMO Members

Effective October 1, 2025

This formulary is the list of prescription drugs available to Sutter Health Plan members for all plans and products Sutter Health Plan offers.

This formulary is subject to change. All past versions of the formulary are no longer in use. Sutter Health Plan last updated the formulary on October 1, 2025. The current formulary is available to members on the CVS Caremark® custom website for Sutter Health Plan members at [info.caremark.com/oe/sutterhealthplan](https://info.caremark.com/oe/sutterhealthplan). It is also available on the Sutter Health Plan website at [sutterhealthplan.org/pharmacy](https://sutterhealthplan.org/pharmacy).

Members can find complete information about their prescription drug benefits, including cost sharing amounts in their Evidence of Coverage and Disclosure Form (EOC). The EOCs are available on the Sutter Health Plan Member Portal at [shplan.org/memberportal](https://shplan.org/memberportal) (registration required).

| <b>Index .....</b>                                                                                           | <b>154</b> |

This document is the Sutter Health Plan Formulary, a list of Food and Drug Administration (FDA)-approved generic and brand name drugs covered by Sutter Health Plan under your outpatient prescription drug benefit. This formulary outlines the preferred drugs covered by your outpatient prescription drug benefit. Drugs that are preferred for certain conditions are listed as Preferred within the description in the Coverage Requirements and Limits column of the drug list portion. The availability of a drug on the formulary does not mean your doctor will prescribe it for your condition. The formulary helps you and your doctor determine the right drug to prescribe to treat your needs. Drugs not listed on the formulary, or “nonformulary drugs,” will also be covered if medically necessary. All nonformulary drugs must be prior-authorized.

The CVS Caremark Pharmacy and Therapeutics (P&T) Committee assesses all drugs included in the formulary for clinical appropriateness, process requirements and coverage limitations. When necessary, the Sutter Health Plan P&T Committee reviews, approves and modifies CVS Caremark selections. Doctors and pharmacists make up both P&T Committees. They meet regularly to decide what drugs should be included in the formulary. The P&T Committees choose drugs based on their safety, effectiveness and value.

## **UPDATES TO THE FORMULARY**

CVS Caremark updates the drugs on a monthly basis, and content may change. Changes to the drugs listed in this formulary may include:

- Removing a drug or dosage form of a drug.
- Changing tier placement of a drug that results in a different cost share.
- Adding or changing prior authorization and step therapy requirements for a drug.

During your plan year, any changes to the formulary that benefit you, such as moving a drug to a lower tier for lower cost share, happen right away. Sutter Health Plan notifies you at least 60 days in advance of any changes that increase your cost share or impose new limits or processes on a drug you take.

You can get the most current formulary on the Sutter Health Plan website at [sutterhealthplan.org/pharmacy](https://sutterhealthplan.org/pharmacy), or the CVS Caremark guest website for Sutter Health Plan members at [info.caremark.com/oe/sutterhealthplan](https://info.caremark.com/oe/sutterhealthplan).

If you have questions about your pharmacy coverage or the list of drugs covered by Sutter Health Plan, call Customer Service at 855-315-5800. Customer Service is available Monday through Friday, 8 a.m. to 7 p.m. Customer Service can answer questions about your pharmacy benefits, including:

- The process for submitting a prior authorization (PA) request (exception request) for drugs that require PA or a step therapy exception.
- Information about drugs covered under your medical benefit versus your pharmacy benefit.
- Actual dollar amounts of your cost sharing (copays, coinsurance and deductibles).

## HOW TO USE THE FORMULARY

Sutter Health Plan organizes the drugs by drug category and class based on the Medi-Span drug classification system. The drugs in each category are in alphabetical order by their generic name or most common brand name.

The formulary lists generic drugs in all ***bold and italicized lowercase*** letters. The formulary lists brand name drugs in all CAPITAL letters followed by the generic name in parentheses in all ***bold and italicized lowercase*** letters.

Example:

| Drug Type    | How drug will appear in the categorical list |
|--------------|----------------------------------------------|
| generic drug | <b><i>Pravastatin</i></b>                    |
| brand drug   | PRAVACHOL ( <b><i>pravastatin</i></b> )      |

When a generic equivalent for a brand name drug is available and covered, Sutter Health Plan lists the generic drug separately from the brand name drug in all ***bold and italicized lowercase*** letters.

When a generic equivalent for a brand name drug is not available or not covered, Sutter Health Plan does not list the generic drug separately.

When a manufacturer markets a generic drug under a proprietary, trademark-protected brand name, we list the brand name after the generic drug in parentheses with the first letter of each word capitalized. For example, (Digoxin) DIGITEK.

Members can search the formulary by using the index, either by generic or brand name, and by therapeutic drug category. Brand names usually cost more and are not preferred over generic alternatives. Any drug not found in this list or any updates published by CVS Caremark or Sutter Health Plan requires prior authorization.

Some drugs have certain process requirements or limitations for coverage. We identify these drugs on the formulary by the letters listed and explained below. Your Sutter Health Plan EOC explains the details of the process requirements and limitations and how you or your provider can ask for exceptions.

| Abbreviation | Definition          | Comments                                                                        |
|--------------|---------------------|---------------------------------------------------------------------------------|
| <b>AG</b>    | Age Edit            | Drug may not be recommended for some patients based on age                      |
| <b>PA</b>    | Prior Authorization | Requires your doctor to request prior authorization to support use of this drug |
| <b>PA**</b>  | Prior Authorization | Requires prior authorization when step therapy is not met                       |

| Abbreviation | Definition      | Comments                                                                           |
|--------------|-----------------|------------------------------------------------------------------------------------|
| <b>QL</b>    | Quantity Limit  | Coverage may be limited to specific quantities per prescription and/or time period |
| <b>ST</b>    | Step Therapy    | Coverage may depend on previous use of another drug                                |
| <b>OAC</b>   | Oral Anticancer | Orally administered anticancer drugs have a maximum limit on the copayment amount  |

## **BENEFIT COVERAGE AND LIMITATIONS**

This printed formulary does not provide information regarding the specific benefit coverage and limitations an individual member may have. Many members have specific benefit inclusions, exclusions, cost shares or a lack of coverage, which the formulary does not reflect. For example, drugs for the treatment of infertility may not be covered. Refer to your specific plan documents for more information regarding your specific coverage.

**Depending on a member's specific benefit, the following may apply:**

### **1. Generic Substitution**

When available, Sutter Health Plan uses the FDA-approved generic drugs in most situations, regardless of the brand name indicated. Members usually have lower cost share when they use generic drugs.

If a member or the member's provider requests a brand name drug instead of an approved generic, the member, based on their coverage, is usually required to pay the additional amount of the difference between the pharmacy's contracted rate for the brand name drug and the allowed prescription drug amount. Doctors can request prior authorization if they determine that there is a medical need for the brand name drug.

### **2. Four-Tier Benefit**

The formulary is a four-tier benefit design. Tiers are the different cost levels you pay for a drug. Each tier is assigned a member cost share. This is how much you pay when you fill a prescription. You can refer to your Benefits and Coverage Matrix to determine your cost share for each drug tier. The four tiers are:

- Tier 1 – Most generic drugs and low-cost preferred brand name drugs are covered at the lowest cost share.
- Tier 2 – Preferred brand name drugs, nonpreferred generic drugs and drugs recommended by the Sutter Health Plan P&T Committee based on safety, efficacy and cost are covered at the second-lowest tier cost share.
- Tier 3 – Nonpreferred brand name drugs or drugs that the Sutter Health Plan P&T Committee recommends based on safety, efficacy and cost are covered at

the third-lowest tier cost share. These drugs generally have a preferred and often less costly therapeutic alternative at a lower tier.

- Tier 4 – Drugs that the FDA or drug manufacturer requires be distributed through a specialty pharmacy, drugs that require the member to have special training or clinical monitoring for self-administration, or drugs that cost Sutter Health Plan more than \$600 net of rebates for a one-month supply.

Sutter Health Plan also uses the following abbreviations next to some drugs to help members identify certain drug categories.

| Abbreviation | Definition                | Comments                                                                                                     |
|--------------|---------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>CM</b>    | Contraceptive Management  | Drugs used for contraceptive management                                                                      |
| <b>DM</b>    | Diabetes Management       | Drugs used for diabetes management                                                                           |
| <b>PC</b>    | Preventive Health or Care | Those preventive care drugs with \$0 cost share                                                              |
| <b>SP</b>    | Specialty                 | Specialty Drugs are usually injectable, oral or inhaled and require close supervision and therapy monitoring |

If your drug is in Tier 2 or 3, look to see if there is a Tier 1 option available. Discuss these options with your doctor. Member cost sharing for oral anticancer drugs will not exceed \$250 per prescription for up to a 30-day supply. If your benefit plan is a high deductible health plan compatible with a health savings account, this does not apply until after you meet your deductible.

It is important to note that drug costs change frequently. If you have a percent-of-cost coinsurance or deductible, you can confirm your cost share by calling CVS Caremark or your pharmacy before picking up your prescription.

### 3. Preventive Care

All preventive care drug categories have products that Sutter Health Plan covers with \$0 cost share. Sutter Health Plan covers these preventive care drugs, including but not limited to contraceptives and smoking cessation products, at \$0 when a participating doctor prescribes and you use a network pharmacy. We list preventive care drugs and products in the print formulary as Tier 0 to help differentiate this group of drugs that have a \$0 cost share. Refer to your EOC for more information regarding coverage of preventive care drugs and products.

### 4. Contraceptive Coverage

Sutter Health Plan covers select FDA-approved contraceptive drugs, devices and other products, including over-the-counter, at \$0 cost share. If your doctor determines you need a drug, device or product that Sutter Health Plan does not cover at \$0 cost share, they can submit a prior authorization for coverage. If CVS Caremark determines the request is medically necessary, Sutter Health Plan covers at \$0 cost share.

Sutter Health Plan covers up to a 12-month supply of FDA-approved, self-administered hormonal contraceptives that a provider, pharmacist or location licensed or authorized to dispense drugs or supplies dispenses at one time to a member.

### **5. Diabetic Drug Coverage**

Sutter Health Plan covers diabetes blood testing equipment, blood glucose meters and their supplies, such as test strips, lancets and lancet devices, under the prescription drug benefit. A participating provider must prescribe the equipment and members must pick up at a participating retail or mail order pharmacy.

### **6. Medical Benefit Drug Coverage**

The formulary only applies to outpatient drugs provided to members. It does not apply to drugs used in inpatient settings like the hospital or administered by a provider in a clinic or office setting.

Sutter Health Plan covers drugs that require administration by a doctor or other clinician (such as a home health nurse) as a medical benefit, rather than a prescription drug benefit. These include chemotherapy, home infusion and injectable drugs (other than self-injectables). You can find complete information about the differences between drugs covered under your medical benefit and drugs covered under your prescription drug benefit in your EOC.

### **7. Prior Authorization**

There are a number of drugs listed in the formulary that require prior authorization to ensure appropriate use based on criteria set by the P&T Committees. Examples include drugs used for complex or non-FDA-approved indications (off-label use), specialty drugs and drugs requiring step therapy. Prescription drugs not listed in the formulary (nonformulary) also require prior authorization to determine medical necessity. CVS Caremark reviews each request on an individual patient need basis.

### **8. Drug Quantity Limits**

Some drugs have quantity limits — drugs that Sutter Health Plan and CVS Caremark cover for specific quantities per prescription or time periods. A member's doctor can request prior authorization for quantities that exceed these limits. Some drugs prescribed for sexual dysfunction, such as Cialis, Levitra or Viagra (or their generic equivalents), are limited to a certain number of tablets per time period.

### **9. Step Therapy**

Step therapy requires providers to prescribe certain prescription drugs for a particular medical condition before Sutter Health Plan covers other drugs with the same indications. When a drug is subject to step therapy, members may have to try one or more first-line drugs prior to CVS Caremark approving a second-line drug.

Sutter Health Plan and CVS Caremark base step therapy requirements on national treatment guidelines, FDA recommendations and the relative cost of treatment. CVS Caremark reviews prior authorization requests for approving exceptions to step therapy requirements when such exceptions are medically necessary and/or clinically appropriate.

## REQUESTING PRIOR AUTHORIZATION

Providers must submit a prior authorization request to CVS Caremark for drugs that require prior authorization, step therapy or exceed the quantity limit. CVS Caremark also reviews requests for medical necessity for nonformulary drugs through this same prior authorization process. Providers can submit a request to CVS Caremark using one of the following methods:

- Fax a completed Prescription Drug Prior Authorization or Step Therapy Exception Request Form to CVS Caremark at 888-836-0730.
- Call CVS Caremark at 844-740-0635 and provide all necessary information requested.
- Online at [covermymeds.com](https://covermymeds.com) (registration required).

CVS Caremark processes and reaches a decision on prior authorization requests within a timeframe appropriate for the patient's condition, not to exceed 72 hours for nonurgent requests and 24 hours for urgent or exigent requests. CVS Caremark notifies the member, or the member's authorized representative, and the prescribing provider of the decision within 24 hours for urgent or exigent requests, and within 72 hours for nonurgent requests. If CVS Caremark does not respond within these timeframes, the prior authorization or step therapy request is considered approved. For nonurgent requests, coverage will be authorized for the duration of the prescription, including refills. For urgent or exigent requests, coverage, including refills, will be authorized for the duration of the exigency.

If CVS Caremark denies the request, the member may file a grievance with Sutter Health Plan. For more information, refer to the Grievances section of your EOC. CVS Caremark may authorize continuation of coverage for a drug previously approved for a member's medical condition, as long as the provider continues to prescribe for the same medical condition and it remains a safe and effective treatment option.

Exigent circumstances exist when one of the following is true:

- A member is suffering from a health condition that may seriously jeopardize their life, health or ability to regain maximum function.
- A member is undergoing a current course of treatment using a nonformulary drug.

An incomplete request may delay the authorization process or result in a denial. Additionally, if the prior authorization request does not meet established guidelines, CVS Caremark may not approve it and may recommend a different drug. Refer to your EOC for more information regarding prior authorization timelines.

## LOCATING A RETAIL PHARMACY

Sutter Health Plan does not cover prescription drugs dispensed by non-participating pharmacies, except:

- For emergency or urgent situations, including drugs prescribed for mental health and substance use disorder treatment, or
- When dispensed as part of a Community Assistance, Recovery, and Empowerment (CARE) agreement or CARE plan approved by a court.

You can search for a participating retail pharmacy by clicking the Find a Pharmacy link at [info.caremark.com/oe/sutterhealthplan](http://info.caremark.com/oe/sutterhealthplan).

You can search for a pharmacy by entering a ZIP code or a city and state.

You can also find a pharmacy by using the CVS Caremark Pharmacy Locator tool on the CVS Caremark member portal at [caremark.com](http://caremark.com) (registration required).

## **MAIL ORDER WITH CVS CAREMARK**

CVS Caremark Mail Service Pharmacy is the CVS Caremark mail order pharmacy. Mail order allows you to receive up to a 100-day supply, as your benefit plan allows, of your maintenance drugs.

If you currently receive your maintenance drug from a retail pharmacy, call CVS Caremark Customer Care at 844-740-0635 and a representative can help you transfer your prescription to home delivery.

If you need to fill a new prescription for a maintenance drug, your doctor can complete a FastStart® New Prescription Fax Form and fax it along with a prescription for up to a 100-day supply to 800-378-0323 or send the prescription electronically.

You can also complete the CVS Caremark Mail Service Order Form and mail it along with your hard-copy prescription and required copay to CVS Caremark at P.O. Box 659541, San Antonio, TX 78265-9541.

## **SPECIALTY PHARMACY SERVICES**

Specialty drugs are usually injectable, oral or inhaled and require close supervision and therapy monitoring. The Sutter Health Plan Specialty Pharmacy Program focuses on patient safety, with requirements designed to assure that you:

- Know how to take these drugs correctly.
- Receive safe, effective specialty drugs.
- Have timely and convenient access to the specialty drugs you need.

CVS Caremark contracts with CVS Specialty®. CVS Specialty provides mail order fulfillment of specialty prescription drugs to the member's home or place of business. (Note: Specialty drugs, regardless of tier, are not available through the CVS Caremark Mail Service Pharmacy mail order program.)

CVS Specialty also provides member programs and services, including access to specialty-trained pharmacists and nurses 24 hours a day, seven days a week, and online tools to help members manage their specialty drugs.

Contact CVS Specialty at 800-237-2767 or visit [caremark.com](https://www.caremark.com).

## DEFINITIONS

Sutter Health Plan may use the following words and definitions throughout this formulary.

**Brand name drug:** A drug that a manufacturer markets under a proprietary, trademark protected name. The brand name drug is listed in all CAPITAL letters.

**Coinsurance:** A percentage of the charges that members must pay for covered services after the deductible, if a deductible applies.

**Copayment:** A specific dollar amount that members must pay for covered services after the deductible if a deductible applies.

**Cost sharing:** The amount members must pay for covered services, including deductibles, copayments and coinsurance. Cost sharing is also referred to as out-of-pocket cost.

**Deductible:** The amount a member must pay for covered healthcare benefits before the member's health plan begins paying for all or part of the cost of the healthcare benefit under the terms of the policy.

**Drug tier:** A group of prescription drugs that corresponds to a specified cost-sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the member's portion of the cost for the drug.

**Exception request:** A request for coverage of a prescription drug. If a member, their designee or prescribing healthcare provider submits an exception request for coverage of a prescription drug, Sutter Health Plan allows coverage of the prescription drug when the drug is determined to be medically necessary to treat the member's condition.

**Exigent circumstances:** When a member is suffering from a health condition that may seriously jeopardize the member's life, health or ability to regain maximum function, or when a member is undergoing a current course of treatment using a nonformulary drug.

**Formulary:** The complete list of self-administered, FDA-approved, outpatient prescription drugs evaluated by the Sutter Health Plan P&T Committee for use and eligible for coverage under the Sutter Health Plan health plan. Formulary is also known as a prescription drug list.

**Generic drug:** The same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance and intended use. A generic drug is listed in all ***bold and italicized lowercase*** letters.

**Member:** A subscriber (defined below), or a qualified dependent family member enrolled in a health plan who is entitled to receive covered services.

**Nonformulary drug:** A self-administered, FDA-approved, outpatient prescription drug that is not listed on the formulary following evaluation by the Sutter Health Plan P&T Committee.

**Participating provider:** A participating provider group, participating physician, hospital, other licensed health professional, or licensed health facility or other health professional authorized under California law to practice in the State of California, who or which, at the time care is provided to a member, has a contract with Sutter Health Plan to provide covered services to members.

**Prescribing provider:** A healthcare provider authorized to write a prescription to treat a medical condition for a health plan member.

**Prescription:** An oral, written or electronic order by a provider for a specific member. The prescription contains the name of the drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the provider, the signature of the provider if the prescription is in writing, and if requested by the member, the medical condition or purpose for which the provider is prescribing the drug.

**Prescription drug:** A drug a member's provider prescribes that requires a prescription under applicable law.

**Prior authorization:** The requirement that the member's participating provider receive prior authorization for a prescription drug before Sutter Health Plan covers the drug. The health plan must grant a prior authorization when it is medically necessary for the member to obtain the drug.

**Step therapy:** Requires providers to prescribe certain prescription drugs for a particular medical condition before Sutter Health Plan covers other drugs with the same indications. When a drug is subject to step therapy, members may have to try one or more first-line drugs prior to approval of a second-line drug.

**Subscriber:** A member who is eligible for membership on their own behalf and not by virtue of dependent status, and who meets the eligibility requirements as a subscriber.

| PRESCRIPTION DRUG NAME                                                                         | DRUG TIER | COVERAGE REQUIREMENTS AND LIMITS |
|------------------------------------------------------------------------------------------------|-----------|----------------------------------|
| <b>ADHD/ANTI-NARCOLEPSY/ANTI-OBESITY/ANOREXIANTS - DRUGS TO TREAT NERVOUS SYSTEM DISORDERS</b> |           |                                  |
| <b>AMPHETAMINES</b>                                                                            |           |                                  |
| <i>amphetamine sulfate tab 5 mg</i>                                                            | 1         | QL                               |
| <i>amphetamine sulfate tab 10 mg</i>                                                           | 1         | QL                               |
| <i>amphetamine tab extended release disintegrating 3.1 mg</i>                                  | 1         | QL                               |
| <i>amphetamine tab extended release disintegrating 6.3 mg</i>                                  | 1         | QL                               |
| <i>amphetamine tab extended release disintegrating 9.4 mg</i>                                  | 1         | QL                               |
| <i>amphetamine tab extended release disintegrating 12.5 mg</i>                                 | 1         | QL                               |
